

MARINE LEISURE PRODUCTS & SERVICES

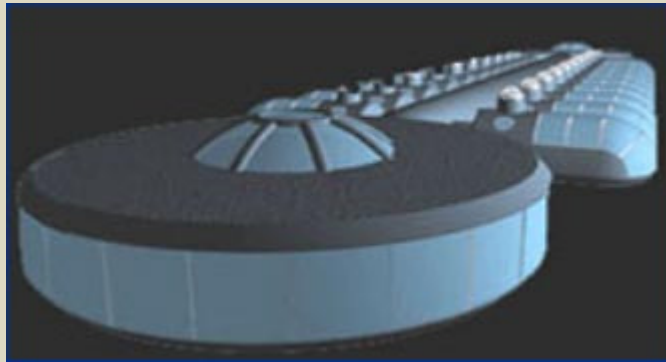

UNDERWATER RESTAURANT-BAR OR HOTEL "MADE TO MEASURE"

An innovative and very unique idea for those who want to attract a pleasing crowd and earn money in the process is to build an underwater restaurant/bar or boutique hotel. We have the right experts who use aquarium technology to put diners face-to-face with the stunning underwater environment. Clients/visitors will be blown away by the colour, clarity, and beauty of the underwater world in the right location, so it seems the perfect idea to build a restaurant where diners can experience fine cuisine and take time to enjoy the views - without ever getting their feet wet.

A distinctive feature is the use of curved transparent acrylic walls and roof, similar to those used in aquarium attractions including Sydney Aquarium, Ocean Park Shark Aquarium in Hong Kong and the San Sebastian Aquarium in Spain. The fact that the entire restaurant except for the floor is made of plexi-glass makes this unique in the world. Every project can be tailor made to the client's specific requirements and budget.

A FLOATING HOTEL or residence with an entire floor underwater. Large acrylic windows that provide a panoramic view of the subsea world. Open air decks to fully enjoy life on the water. And an optional generator, watermaker, solar power system and sewage treatment setup to provide you with complete, ecologically acceptable independence, if necessary. Permanently anchored from a four point mooring system. Commute by boat. Enjoy the underwater world in perfect comfort and safety. A new lifestyle, dramatically different from your peers. Unique, Peaceful & Exploratory.

MODERN TOURIST SUBMARINES

The marine leisure segment is the fastest growing of the travel industry and is evident from the success and growth of sea parks, the cruise industry and seaside destination resorts. Now tourist submarines with their environmentally friendly propulsion systems and safe way for non divers to enjoy the view below the water, it is fast becoming popular amongst all ages.

Many savvy tourists nowadays expect new experiences on their holiday trip and that's where a tourist submarine is unbeatable.

There are fewer than 30 (in 2004) operational tourist submarines in the world and there is place for many more. They carry altogether almost a million tourists every year to the fascinating underwater world. The best operation sites have well over 100,000 passengers per year.

The advantages of a tourist submarine investment/operation are clear:

1. Increase the value of the tourist product of the area where it operates. Very few purpose build submarines operating in the world.
2. It is unique for people who are not in a position to dive and to be able to see the underwater world.
3. It is environmentally friendly because it is battery operated. It does not consume fuel such as diesel.
4. It is educational for small children and adults alike.
5. It is a unique experience to enter into a real submarine.

The initial step is for us to get appointed to do a feasibility study in the area you may be considering operating a tourist sub.

PASSENGER SHIP SALES & CHARTERS

By doing business right in the back yard of a country with a long history of maritime tradition, it is only fitting that we are in a strong position to offer and arrange passenger vessels (cruise ships & ferries) for purchase or charter. Since we have no preference for any one particular ship, we can propose vessels for each specific requirement. We can also assist in new construction or rebuilding an existing passenger vessel since we work with many local and other European shipyards.
